

First survey

- 1- What do you think about the 5 steps of the flowchart? (graded: 1 not relevant to 9: very relevant)

	Do not want to respond	Cannot respond	1	2	3	4	5	6	7	8	9
Exam or treatment planned	Consensus reached										
Regulatory data of the prescription											
Patient information											
Radiopharmaceutical prescribed											
Dose preparation											

- 2- Are the names of the items suited? Do you want to add or delete items?

- 3- What do you think about items related to “exam or treatment planned” (graded: 1 not relevant to 9: very relevant)

	Do not want to respond	Cannot respond	1	2	3	4	5	6	7	8	9
Information, advice to patients or parents	Consensus reached										
Premedication check											
Date of the exam											

- 4- Are the names of the items suited? Do you want to add or delete items?

- 5- What do you think about items related to “Regulatory data of the prescription of the prescription” (graded: 1 not relevant to 9: very relevant)

	Do not want to respond	Cannot respond	1	2	3	4	5	6	7	8	9
Validity of the prescription	Consensus reached										
Date											
Prescriber identification/Signature											
Authorization of the prescriber											

- 6- Are the names of the items suited? Do you want to add or delete items?

- 7- What do you think about items related to “patient” (graded: 1 not relevant to 9: very relevant)

	Do not want to respond	Cannot respond	1	2	3	4	5	6	7	8	9
Identification	Consensus reached										
Age/date of birth											
Weight, length/height, body surface area and BMI											
Access to patient file : pathology, allergy, intolerance, inclusion in a clinical trial, other prescription , time between exams											
Access to biological data (liver and kidney functions, platelet count)											

- 8- Are the names of the items suited? Do you want to add or delete items?

- 9- What do you think about items related to “Radiopharmaceutical data” (graded: 1 not relevant to 9: very relevant)

	Do not want to respond	Cannot respond	1	2	3	4	5	6	7	8	9
Indication	Consensus reached										
Radiopharmaceutical choice											
Protocol											
Dosage											
Drug interaction											
Contraindication											
Radiopharmaceutical availability (drug order)											
Route and mode of administration											
Specific circuit radiopharmaceutical											
Injection site information											
Validation and pharmaceutical opinion,											

- 10- Are the names of the items suited? Do you want to add or delete items?

- 11- What do you think about items related to “Dose preparation ” (graded: 1 not relevant to 9: very relevant)

	Do not	Cannot	1	2	3	4	5	6	7	8	9
--	--------	--------	---	---	---	---	---	---	---	---	---

	want to respond	respond									
Information to technicians in charge of preparation	Consensus reached										
Syringe preparation or other preparation											
Specificity of the pediatric preparations (small volume, dilution...)											
Specificity of the preparations for clinical trial											
Devices choices for preparation (luer, luer lock)- Compatibility between radiopharmaceutical and device											
Macroaggregates number for specific radiopharmaceutical											

12- Are the names of the items suited? Do you want to add or delete items?

13- Concerning conflict of interest

- I declare I do not have a conflict of interest
 Other

14- Are you?

- Radiopharmacist
 Nuclear medicine physicians
 Resident in radiopharmacy
 Medical physicists
 Hospital pharmacist
 X-ray technicians
 Pharmacy technician
 Other:

Second survey

1- Are you?

- Radiopharmacist
 Nuclear medicine physicians
 Resident in radiopharmacy
 Medical physicists
 Hospital pharmacist
 X-ray technicians
 Pharmacy technician
 Other:

2- So you think about the text introducing the flow chart? (graded: 1 not relevant to 9: very relevant)

	Do not want to respond	Cannot respond	1	2	3	4	5	6	7	8	9
Introduction	Consensus reached										
Field of application											
Prerequisite											
Pharmaceutical analysis description											
Information needed for preparation											

3- Are the names of the items suited? Do you want to add or delete items?

4- What do you think about the 3 steps flow chart? (graded: 1 not relevant to 9: very relevant)

	Do not want to respond	Cannot respond	1	2	3	4	5	6	7	8	9
Step 1: Regulatory data	Consensus reached										
Step 2 : Patient data											
Step 3 : Radiopharmaceutical											

5- Are the names of the items suited? Do you want to add or delete items?

- 6- What do you think about items related to “Legal requirements” (graded: 1 not relevant to 9: very relevant)

	Do not want to respond	Cannot respond	1	2	3	4	5	6	7	8	9
Date of the prescription	Consensus reached										
Prescriber identification											
Signature											
Habilitation of the prescriber											
Reference to hospital and nuclear medicine department											
Identification of the patient (name, first name, sex, age, Weight, length/height, unique patient identifier)											
International non-proprietary name prescription											
Specific prescription for product derived from human blood or human plasma											

- 7- Are the names of the items suited? Do you want to add or delete items?
 8- What do you think about items related to “patient” (graded: 1 not relevant to 9: very relevant)

	Do not want to respond	Cannot respond	1	2	3	4	5	6	7	8	9
Weight check	Consensus reached										
Pathology											
Drug history											
Actual prescription											
Allergy											
Intolerance											
Time between radiopharmaceutical administration and chemotherapy/radiotherapy /hematopoietic growth factors											
Imaging exam history											
Kidney function											
Liver function											
Platelet count	Consensus not reached										

9- Are the names of the items suited? Do you want to add or delete items?

10- What do you think about items related to "Radiopharmaceutical" (graded: 1 not relevant to 9: very relevant)

	Do not want to respond	Cannot respond	1	2	3	4	5	6	7	8	9
Compliance between exam request and the radiopharmaceutical prescribed	Consensus reached										
Indication											
Compliance to local protocol											
Dosage (EANM dosage card, minimum activity)											
Contra indication (age, new born, pregnancy, presence of alcohol benzylic ...)											
Drug interaction											
Route and mode of administration											

11- Are the names of the items suited? Do you want to add or delete items?

12- Other comments
